after the same pattern as the xiii th general assembly of the international astronomical union the present volume of the highlights in astronomy contains the texts of the

invited discourses given at the xivth general assembly held in brighton england august 1970 it contains further the papers and discussion remarks presented at the six joint discussions as well as the invited papers given at the special session on the moon in addition this volume contains the papers given at the joint meeting of commissions 24 27 30 33 and 37 on rr lyrae stars it goes without saying that the nearly hundred papers printed in this volume represent only a minor part of all matter dealt with at the xivth general assembly of the union the many important discussions that took place in a few hundred commission meetings are not included for short abstracts and reviews of these the reader is referred to transactions of the international astronomical union xivb i wish to thank those who contributed to this volume for the speed in submitting the manuscripts of their papers this together with the efficiency of the publishers allowed for a rapid publication

this second international symposium on mucus in health and disease once again brings together basic scientists such as biochemists anatomists biologists and clinicians who are dealing with aspects of mucus in the various tracts of the body where it is of such great functional importance it is fitting that the meeting should take place at manchester university where there is so much activity in this field and our grateful thanks are due to or eric chantler for his untiring efforts in organising this meeting at the first mucus meeting sir francis avery jones stated this is a subject which will justify further symposia both local and international as he predicted this meeting succeeds the first and adds further to our progress in understanding the complex and unique structure and function of the mucus secretion in its various sites of the body much was learned from the first meeting and it is hoped that the second will be an appropriate successor to it the emphasis in this meeting has been to encourage discussion and the presentation of research material in this respect review articles have been kept to a minimum the structure of the conference has been organised around eight keynote addresses one on the biosyn thesis of the general mucus glycoproteins and another on its physical properties other keynote papers are on the biochemical and clinical aspects of mucus in the respiratory gastrointestinal and urogenital tracts by recognised authorities in these subjects

for a host of reasons nonlinear optical spectroscopy is a valuable tool for biochemical applications where minimally invasive diagnostics is desired

biochemical applications of nonlinear optical spectroscopy presents the latest technological advances and offers a perspective on future directions in this important field written by an international panel of experts this volume begins with a comparison of nonlinear optical spectroscopy and x ray crystallography the text examines the use of multiphoton fluorescence to study chemical phenomena in the skin the use of nonlinear optics to enhance traditional optical spectroscopy and the multimodal approach which incorporates several spectroscopic techniques in one instrument later chapters explore raman microscopy third harmonic generation microscopy and non linear raman microspectroscopy the text explores the promise of beam shaping and the use of broadband laser pulse generated through continuum generation and an optical pulse shaper lastly the book discusses the effects of spatial beam shaping on the generated nonlinear raman signals in a tightly focused geometry and provides insight into the extension of nonlinear optical spectroscopy to the nanoscale through the use of plasmonic tip enhanced arrangement with novel experimental approaches to this technology expanding day by day the book s balanced coverage from a wide range of international contributors not only elucidates important achievements but also outlines future directions in this dynamic and promising field

although several monographs and reviews have appeared on individual polymers of this type and their applications and other technical aspects have also been discussed this is apparently the first book to deal with the physical chemistry of water soluble synthetic polymers as a group this collective survey enables their properties and behaviour to be compared and to be correlated with their molecular structures for predictive purposes however this has made it necessary to critically re appraise much of the earlier fundamental work so that current discussion of more recent work can be put on a proper basis thus of the 1800 or so references cited the middle two thirds related to the twenty year period centred on about 1968 nevertheless sufficient key recent references have also been included so that the existing state of the art is delineated
